INPLANT TRAINING

DotDot salon management system is specially designed for managing a customer's appointment fixing. This system keeps track of all the activities that are carried on daily within the salon. It maintains sales and service of products. It also manages individual employee salary and incentives. The system is even equipped to manage customer billing and data storage. This fully equipped system alone manages the entire functioning of a hair salon.

CONFERENCE/JOURNALS

Rangha Tours and Travels Booking

Tours and travels booking management system project is a web based application useful for managing different types of bookings for using a single application. This application is developed to flight arrangements, railway arrangements, rental taxis, vehicles, tour excursions, cruise information and accommodation, and hotels, travel agents have a lot of clout. They can provide a complete travel package, including shuttle service to and from the airport and even the services of a personal tour guide if requested.

ACADAMIC PROJECTS

Apartment Management System

Main objective of this project is to design a software application for construction companies who manages different apartments and there maintenance on monthly basis. This software covers modules like handling requests for apartment owners, tenants maintaining monthly expenses for every apartment, invoice, billing details, payments, hardware used..etc. And this project contains one collaboration section like Social network with events, groups, and post. It will be more helpful to interact with people's each other's and they can share anything with that society.
